Dear ASPNR Board of Directors and Society Members,

Thank you for considering my application for the Junior Member at Large position on the ASPNR Board of Directors. I am an Assistant Professor of Radiology at Vanderbilt University and have been an active ASPNR member since 2019. The society's commitment to education and mentorship have been foundational in my professional growth, and I hope to further strengthen these important pillars of the ASPNR through service on the Board. Here, I would like to highlight my most meaningful ASPNR committee service in social outreach and professional mentorship. Additional relevant contributions, such as three invited lectures and seventeen poster submissions to the APSNR meeting, are highlighted on my annotated CV.

As a fellow during the COVID-19 pandemic, I recognized the potential of digital platforms for broader educational outreach in pediatric neuroradiology. This insight guided my decision to join the ASPNR Social Media Committee in 2021. Since then, I have played a key role in strengthening the society's national and international presence by sharing high-value educational cases and promoting live lecture content. My service on the Program Committee for Public Relations and Social Media for the ASPNR 2026 meeting, including a new initiative highlighting conference speakers ahead of the meeting, further allowed me to shape engagement strategies and elevate enthusiasm for the event.

Mentorship within the ASPNR has been instrumental in my career development, and I have worked deliberately to pay that forward as an attending physician. I have mentored nine trainees and junior faculty on projects for ASPNR annual meetings, including a winner of best educational poster and three projects invited for publication in Pediatric Radiology and AJNR: Clinical Practice. In 2025, I joined the ASPNR Mentorship Committee where I have mentored two trainees through contributions to the ASPNR Mentored Core Case Collection and Mentorship Matters Webinars. My involvement as a program committee member for the YPS Mentorship Mixer at the 2026 and 2027 ASPNR national meetings has helped to create an engaging venue for training and early career support for pediatric neuroradiologists.

I truly love being a member of the ASPNR and hope to continue to help our society flourish and thrive. I believe my continuing engagement in mentorship and social outreach initiatives within the ASPNR will enable me to contribute to this goal. I would greatly appreciate your consideration for the position of Junior Member at Large for the ASPNR.
