**Pediatric Neuroradiology Section Chief**

The Department of Radiology at Stanford University and Stanford Children’s Health seek a pediatric neuroradiologist to join the faculty and to serve as Section Chief of Pediatric Neuroradiology. The Section Chief of Pediatric Neuroradiology will lead clinical operations, teaching, and research activities for the pediatric neuroradiology program within the Division of Pediatric Radiology.

This full-time position will be at the Assistant, Associate, or Professor level in the University Tenure Line, University Medical Line, or Clinician Educator Line. The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. The major criteria for appointment for faculty in the University Medical Line is excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill. The major criteria for appointment in the Clinician Educator Line is excellence in the overall mix of clinical care and clinical teaching appropriate to the programmatic need the individual is expected to fulfill. Academic rank and line will be determined by the qualifications and experience of the successful candidate.

The ideal candidate must have demonstrated both scholarly and clinical achievement in the subspecialty of pediatric neuroradiology (including advanced neuroimaging techniques) and track record for mentoring junior faculty. A significant track-record with NIH and/or industrial funding is strongly desired. Exceptional leadership and administrative skills are also required. The applicant must have an M.D. or M.D./Ph.D. degree(s) or equivalent, must be board-certified in diagnostic radiology, and must have completed a formal training in pediatric neuroradiology or equivalent training/experience.

Stanford University and LPCH are committed to improving pediatric healthcare through excellence and image-based clinical care, education of future radiologists, and translational research for pediatric imaging. A full range of primary through quaternary services is provided, and Centers of Excellence include Cancer, Cardiovascular medicine, Perinatology (newborn and fetus), and Neuroscience. The Department of Radiology at Stanford is currently expanding, with significant growth in both the clinical divisions and translational sciences. The Department of Radiology has eight basic science PhD faculty focused on neuroimaging. Further, exceptional opportunities exist for collaborative research in all aspects of neuroimaging across the university, with numerous faculty members in the School of Engineering and the School of Humanities and Sciences. Stanford University has a major initiative in the Wu Tsai Neurosciences Institute. LPCH houses state-of-the-art equipment, including multiple 3T MRI systems, a PET-MR, and an intra-operative MRI, enabling outstanding clinical imaging and translational research.

Please submit your curriculum vitae and a candidate statement describing your clinical, research, teaching, and administrative leadership experience and interest. The Radiology Department, School of Medicine, and Stanford University value faculty who are committed to advancing diversity, equity, and inclusion. Candidates may optionally include as part of their candidate statement a brief discussion of how their work will further these ideals. Submission should be via the Department of Radiology website: [Apply Now](#).

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University’s research, teaching and clinical missions.
